

# Fire Extinguisher Wall Sticker Sign

## Installation Instructions

Your Wall Sticker has “Post-It-Note” like adhesive and will not damage your wall. Plus, your Fire Extinguisher Wall Sticker will stick to almost anything, even cinder block.

The sticker is removable so you can GENTLY remove it from the wall to reapply it in either the same location or a new location.

NOTE: If there is loose or peeling paint on the surface, removing the sticker may also remove the loose or peeling paint. Also, low VOC paint can prevent proper adhesion.

- 1 - Remove the sticker backer about half way down.
- 2 - Place the top of the sticker where you want it on the wall then press into place with your hand starting in the top center and working down or out.
- 3 - Remove the rest of the backer holding the remaining sticker away from the wall.
- 4 - Using your hand, smooth the sticker into place using downward strokes.
- 5 - If you have any bubbles, gently lift the corner or edge nearest the bubble and reapply the sticker with your hand smoothing the bubble out the edge.
- 6 - Continue to remove all the bubbles.
- 7 - Once you are are finished, again press the entire sticker firmly against the wall using a downward or sideways motion with your hand.

To remove the sticker, peel a corner off then gently pull outward lifting the sticker off the wall.
